

NANO KOREA 2024

The 22nd International Nanotech Symposium & Exhibition

Prof. An-Chou Yeh

National Tsing Hua University, Taiwan ROC

An-Chou Yeh is a Professor at the Materials Science and Engineering Department, National Tsing Hua University and also the Deputy Director of the High Entropy Materials Center in Taiwan. An-Chou Yeh received a First Class Degree Honours in Aerospace Materials Engineering from Imperial College London, and a PhD in Materials Science and Metallurgy from University of Cambridge. After graduation, he joined the National Institute for Materials Science, Japan, as a Postdoctoral Research Fellow. He has published over 115 peer-reviewed articles and owned 19 patents. He is the pioneer of the development of High Entropy Superalloys. He has been awarded the Marcus A. Grossman Young Author Award by ASM International, Excellent Young Engineer Award by Taiwan CSME, Mercator Fellowship Award by Germany DFG, Excellent Yong Academic Researcher Award by Taiwan MRS-T. He is the World's Top 2% Scientists in the field of Materials according to Stanford University's Meta-Research Innovation Center.
