

# NANO KOREA 2024

The 22nd International Nanotech Symposium & Exhibition

---

## **Associate Professor. Jiheong Kang**

KAIST, Korea

---

**Jiheong Kang** is currently an EWON Associate Professor in the Department of Materials Science and Engineering at KAIST. He earned a Bachelor of Science degree in Chemistry from Seoul National University in 2012. Following this, he pursued his doctoral studies under Professor Takuzo Aida at the University of Tokyo, where he was awarded a Ph.D. in Polymer Chemistry in 2017. After completing his Ph.D., Kang conducted postdoctoral research at Stanford University, working with Professor Zhenan Bao. He began his academic career at KAIST in 2020 as an Assistant Professor. His research group is now dedicated to exploring dynamic supramolecular chemistry and soft materials, aiming to develop innovative solutions for the current challenges in healthcare devices and energy storage systems.
