

NANO KOREA 2024

The 22nd International Nanotech Symposium & Exhibition

Prof. Dr. Sun-Je Kim

Department of Physics, Myongji University,
Republic of Korea

Prof. Sun-Je Kim received his PhD in 2019 from the School of Electrical Engineering, Seoul National University, South Korea, for research in the area of nanophotonics. He then held one and half year of postdoctoral fellowship at the same university. He joined Myongji University as an assistant professor in September of 2020 and is running his lab (Photonic Information and Energy Lab) until now.

His research interests cover a wide range of nanophotonics and hybrid flat optics, including plasmonics, metasurface, holography, and imaging system design. His work has resulted in more than 50 publications, including journal/conference papers.

He has served as assistant administrator for Optical Society of Korea (2023-2024) and is a member of Optical Society of Korea, OPTICA, and SPIE.
