

# NANO KOREA 2024

The 22nd International Nanotech Symposium & Exhibition

---

## **Prof. Seungjun Chung**

Korea University, Korea

---

Dr. Seungjun Chung received his Ph.D. degree in Electrical Engineering and Computer Science (EECS) from Seoul National University, Korea, in 2012. He then joined Prof. Subramanian's group in the Dept. of EECS at the University of California, Berkeley, as a postdoctoral researcher. He continued his research as a principal research scientist at the Soft Hybrid Materials Research Center, Korea Institute of Science and Technology (KIST), and is now an associate professor in the School of Electrical Engineering at Korea University. Dr. Chung was a KIST Young Fellow and an expert in technology level evaluation for the Ministry of Science and ICT, Korea. His current research interests include printed semiconductor devices and their physics, as well as the manufacturing of low-cost thin-film nanoelectronics.
